

FOR IMMEDIATE RELEASE

UBCC Recognized By CPA Magazine as a Top 50 Practitioner Product

Elite 2009 Listing Features 50 Top Practitioner Products Spanning Eleven Categories!

July 07, 2009 – Taos, New Mexico - Universal Business Computing Company (www.ubcc.com), the leading provider of high volume, high productivity software for payroll and Write-Up professionals, announced today that UBCC was selected and listed in the Payroll category by CPA Magazine as a Top 50 Practitioner Product. This award, formerly presented to the Top 100 Practitioner Products, has been made more exclusive in 2009 by listing only the Top 50 Practitioner Products.

UBCC, led by Co-Founder and President Ken Garen, CPA, has been gaining national and international recognition for providing the accounting, finance, and business industries with technology that allows for the highest level of productivity while remaining uniquely flexible through its inherent platform-independent design. "UBCC has a well-established national client base, who for over a decade have voiced their opinions that UBCC has the most flexible and productive technology on the market," said T. Steel Rose, CPA, Editor, CPA Magazine.

Garen believes that the key to UBCC's long-time success is tied directly to the flexibility and productivity of UBCC's software design and ongoing investment into continual product innovation – which has allowed their Payroll and Write-Up clients to stay far ahead of the competition for more than twenty-five years. "We are excited about being selected and extend our gratitude to CPA Magazine for their work in qualifying this truly elite list," said Garen.
