

FOR IMMEDIATE RELEASE

2009 UBCC Client Conference a Great Success

Hands-on labs and productivity training proves invaluable

October 02, 2009 – TAOS, NM. – Universal Business Computing Company (www.ubcc.com), the leading provider of high volume, high productivity payroll and accounting software, announces their 2009 UBCC Client Conference was a great success.

On September 23 – 25, 2009, UBCC clients from across the nation gathered at the 2009 UBCC Client Conference held at the Bellagio, Las Vegas, NV. “Our conference is unique for a number of reasons. Our clients brought a backup of their UBCC software on a thumbdrive, which allows them to immediately incorporate new productivity techniques from the hands-on lab portion of the conference back into their office, which instantaneously increases productivity when they returned to their practice after attending our conference. Additionally, our sessions and hands-on labs are led by our technical support staff, all of whom are U.S. based, which allows our clients to work more closely with the same people they connect with by telephone during the year, which builds stronger trusted relationships,” said Ken Garen, CPA, Co-founder and President of UBCC.

“UBCC’s client conference allows us to spend up to three days engaged in intensive training on the software and associated processes that can make our firm much more efficient. We appreciate being face-to-face with the UBCC support staff to problem solve open items and to address any questions that arise as we dig deeper into the strengths of the software,” said Steven Henry, Henry, Waters and Associates, Inc, Boulder, CO. "UBCC software has a lot of functionality that our office has only scratched the surface on in overall utilization." This year’s conference included sessions addressing Write Up, Bank Reconciliation, Depreciation, Accounts Receivable, Accounts Payable and all aspects of Payroll. Additionally, attendees participated in sessions promoting increased efficiency and profitability in practice led by:

- InsureLinx, a web-based platform provided by Cennarius, allowing payroll providers to offer pay-as-you-go workers’ compensation insurance;
- Intercept EFT, Direct Deposit, Direct Payment, Credit Card Processing, Check Conversion/Guarantee, Remote Deposit/Image Processing, along with Origination/Wire Software;
- iTransact, low cost, high quality merchant accounts payment processing for credit cards and checks, debit and EFT, e-checks, and even gift cards, online or in store (or both);
- Print Management Partners, provider of checks, forms and paper supplies;

- SwipeClock, an online time and attendance solution for businesses, both large and small.
