UBCC Announces ACH Automatic Payments Feature Added to their Payroll Service Bureau Programs

November 18, 2009 – TAOS, NM. – Universal Business Computing Company (www.ubcc.com), the leading provider of high volume, high productivity payroll and accounting software, announces ACH automatic payments feature has been added to their payroll service bureau program, fully-automating the ACH tax payment process.

“The most critical aspect when considering payroll software is how efficient the software can make your practice,” said John Moore, founder and owner, Accent Payroll, Shawnee, KS. “This enhancement has completely eliminated the requirement to key in ACH payments for Federal and State Government Agencies, and allows the payroll service bureau to send all of their clients payments in a single file” said Ken Garen, CPA, Co-founder and President of UBCC. “Clients greatly appreciate the flexibility and productivity our technology affords, we are the only payroll software that can completely run a 20 employee payroll in 30-seconds or less,” continued Garen.

UBCC’s newly released fully automated ACH payments feature allows the user to:

- Designate ACH funds transfer for payment of federal and state payroll taxes;
- Eliminate any need to make hand-keyed ACH entries;
- Designate separate ACH payments from any bank account or impounding account for each payroll client; and
- Set ACH automatic payment preferences on a tax-by-tax basis, each able to be paid out of specific accounts, designated by the payroll professional.
