

FOR IMMEDIATE RELEASE

Marquis Who's Who in America® 2011-2012 Edition Selects Ken Garen, CPA, Co-founder and President of UBCC

Powerful and flexible UBCC software design drives firm profitability and earns Garen national recognition

October 14, 2010 – Taos, New Mexico - Universal Business Computing Company (www.ubcc.com), the leading provider of high volume, high productivity software for accounting and payroll professionals, today announced that Ken Garen, CPA, Co-founder and President of UBCC, has been selected for the 2011 - 2012 Edition of Marquis Who's Who in America®.

"I am very pleased to be selected again by Marquis Who's Who in America," commented Ken Garen, CPA, Co-founder and President of UBCC. For 30 years UBCC has maintained a reputation for designing powerful, customizable Write Up and payroll software, with productivity features that remain consistently ahead of the curve. "It is an honor to be recognized for providing payroll and accounting professionals with the industry's most powerful and flexible software that delivers profitability well beyond the norm," continued Garen.

UBCC's Write Up and payroll software allows users the flexibility to work in the most productive and comfortable way based on operator preference. Users can set up their interface to work in a mouse-driven drop-down or tree-style screen, or work in a heads-down keystroke command mode to achieve maximum productivity. "When operators have the flexibility to work in their most productive mode, profitability dramatically increases," said Garen.

UBCC's software flexibility extends well beyond operator preference and into the seamless import and export of data. "The [UBCC] software runs on over 700 platforms, including all Windows, Linux, and UNIX operating systems, and even IBM mainframes," continued Garen. UBCC software operators import and export data in any order that is needed, and do so from the most commonly used accounting and tax preparation software providers, including CCH, Lacerte, UltraTax and Drake tax preparation software.

About Ken Garen
