

THE PRODUCTIVITY, FLEXIBILITY, AND CUSTOMER SERVICE TO RUN BIGGER AS A SOLO PRACTITIONER

GREENFIELD, IN – UBCC is very well organized in many productivity aspects including file storage, tax payment tracking, and batch queues which translate into great productivity benefits for my business. As a solo practitioner, you would be well-advised to demo their software, it is the most productive, powerful and flexible software I have ever used. Several software features come to mind as making my job easier, including:

- UBCC came equipped with a file cabinet already organized for us, keyword searchable, taking only seconds to retrieve a PDF file, while our old provider required us to create our own filing system.
- UBCC's tax payment tracking significantly reduces time and energy wasted looking for numbers that are not located in the same report.
- UBCC batch queues can learn repeated tasks so you never need to remember what reports each individual client needs, the reports are automatically run each pay period!

POWER + CUSTOMIZED REPORTS = FLEXIBILITY

UBCC has increased our overall efficiency because of its power and flexibility in manipulating raw data. UBCC's report generator allows us to work more efficiently than we could with our old provider. With UBCC we take raw data and create an aggregated report so we are able to track history of tax payments made. This report is added to our batch queues and run instantaneously in the background when we complete a payroll. Getting customized reports out of our previous technology was frustrating and time consuming, I had to spend 15-20 minutes manipulating existing reports. With UBCC I no longer have to do any of that, their software automatically generates customized reports for each client, which saves me a lot of time.

FEATURE REQUESTS ARE ALWAYS TAKEN SERIOUSLY

We are confident our feature requests are taken seriously and usually integrated very promptly. Recently I made four software feature requests to UBCC. UBCC integrated all requests within one to eight weeks, depending on the complexity of the request. As a result, I have decreased the time I am involved in managing clients' payroll. After a feature request is added to UBCC software, they send the updated file to me immediately and also send it in a monthly update to all UBCC software users. UBCC's responsiveness means the entire UBCC community can benefit from each other.

CUSTOMER SERVICE MAKES UBCC DIFFERENT

The support UBCC consistently provides is not the black hole it seems to be with many other businesses that we deal with. UBCC has always been willing to help us in any way they could. Our support questions are promptly and exhaustively answered.

Long before switching to UBCC, their team was diligent with follow-up and genuinely concerned about helping us make a successful change to their payroll software. We never felt manipulated or forced to make the move to their software. Every step of the way they offered to do anything we need to ease the transition including communicate with our previous software provider or be a liaison for us through the process of changing to their software.

David Sterrett
Payroll Professionals, LLC
Greenfield, IN

"UBCC's level of support, updates, and forethought in software design has enabled me to say YES to every request I've ever received from a client. I have never known software like UBCC's, one that can do a direct deposit to 9 different bank accounts for 1 employee."

PRODUCTIVITY, FLEXIBILITY, AND PORTABILITY ADD UP

Write Up and payroll software that runs on your existing hardware.

Since 1981, UBCC's multi-user, multi-tasking real-time software has helped accounting and payroll practices manage their business with maximum productivity, flexibility, portability.

UBCC software has been engineered to allow for on-demand free flow of information, with the data in the client's system being the client's property – not UBCC's – allowing users to easily get information out at any time and for any reason. All information in UBCC's software data files can be sent to CSV or PDF files, and UBCC users can easily import huge amounts of data from CSV files as well.

The **PRODUCTIVITY** features that UBCC has engineered into their software go well beyond on-demand free-flowing CSV or PDF file information. Users can set up their user station to work in a mouse-driven drop-down or tree-style screen, or set user preferences and choose if he/she wants to work in a heads-down shortcut keystroke command mode to achieve maximum productivity. Whatever mode users find most comfortable or intuitive for their preferences can be accommodated by UBCC. Each user get to define how they want "their" UBCC to work. Users can easily run a one-minute payroll, or print customized, unique, or even odd date reports immediately without any delay for sorting from the technology.

UBCC software has the most **FLEXIBILITY** of any provider on the market. Users import and export data in any order that is needed and do so from the most commonly used accounting and tax preparation software providers including CCH, Lacerte, UltraTax and Drake tax preparation software. It is because of the highly flexible way in which UBCC technology has been engineered that users can easily switch from one tax preparation software to another. This level of flexibility becomes radically important when considering the long-term ramifications of switching technology providers and risking some software that won't allow information out.

UBCC has engineered their software for maximum **PORTABILITY**. Users can easily copy their entire UBCC software application and all client data files to a thumbdrive and instantly use the software on different computer operating systems – which is highly desirable and not common in software. UBCC runs on over 700 platforms, including all Windows, Linux, and UNIX operating systems, and even IBM mainframes. A practice using UBCC can grow from one to hundreds of users or switch operating environments as needed, and preserve its investment in hardware, data files, software and training time. Portability means that a company can count on being able to run its accounting, payroll, and tax software on a five-year old Windows-based PC or the latest operating system.

UBCC OFFERS FOUR DIFFERENT SOFTWARE PACKAGES: Client Data Center, Payroll Service Bureau, PEO Enterprise, and Real-Time Accounting for Business. Modules include: Unified Payroll, General Ledger, Accounts Payable, Accounts Receivable, Bank Reconciliation, Depreciation, Order Billing, Inventory Management, and Job Management. Technical support and customer service is available 24 hours a day, seven days per week.

2009 CPA MAGAZINE TOP 50 PRACTITIONER PRODUCT!

"UBCC has a well-established national client base, who for over a decade have voiced their opinions that UBCC has the most flexible and productive technology on the market."

T. Steel Rose, CPA,
Editor, CPA Magazine

"For 30 years we have provided the accounting, finance, and business industries with technology that allows for the highest level of productivity while remaining uniquely flexible through inherent platform-independent design."
