

UBCC IS GIVING ME THE FREEDOM AND TOOLS TO RUN MY BUSINESS AND GROW IN ANY WAY I WANT TO

TAMPA, FL – We all have ideas about how we want to run our business; it is reassuring to have UBCC give me that freedom. UBCC has never told me, “This is how you need to handle this.” Instead, UBCC flexes with me by giving me support and tools that allow me work and grow in any way I want to.

HOW DOES UBCC SOFTWARE COMPARE?

Before UBCC I used two other software packages. The first was a DOS-based system that I was very happy with because of its speed, accuracy, and reporting capabilities. Ten years ago there was a big push to shift to a Windows-based operating system; I was forced to move into a mouse-driven graphical Windows product. After years of suffering through painfully slow software, I changed to UBCC because their software moved me into a stable, accurate, and powerfully fast operating environment I wanted to work in. Changing to UBCC was one of the best business decisions I could have made, their software serves as the backbone of my successful business.

UBCC CONTINUOUSLY ENHANCES THEIR SOFTWARE

UBCC has always been on the cutting-edge of technology. I believe UBCC software development is user-driven, rather than company driven. UBCC is unique because they listen to users and really consider implementing our requests. There are several enhancement ideas I have given UBCC that they have actually implemented – their response to any request has always been positive and welcoming. UBCC has given me all the technology I need to be very competitive.

WHAT AUTOMATED ADVANTAGES DOES UBCC PROVIDE?

What automation really boils down to is that I have the technology tools from UBCC to increase my client base without increasing my staff or overhead. You simply cannot beat the automation and flexibility UBCC has engineered into their software.

Chuck Barreto
Accurate Payroll Solutions, Inc.
Tampa, FL

“I have not had any second thoughts since the first day on board with UBCC. If someone told me I had to change software systems and move away from UBCC I would probably sell the business rather than change. You can't replace UBCC's level of productivity.”

TIME SHEET AUTOMATIC IMPORT FROM EXCEL OR A THIRD PARTY TIME AND ATTENDANCE PROGRAM: Directly import time and attendance into UBCC's payroll software, quickly verify totals and print in one keystroke.

QUARTERLY AND YEAR-END REPORTING: I will pull up one print job and in one keystroke I tell UBCC to run the 941 and state unemployment tax return and a cover letter for every client. UBCC automatically creates a PDF, a printed page, and an electronic file for submission.

MANDATORY NEW HIRE REPORTS: UBCC automatically looks for every employee hired during a defined time period, from every company, and with one keystroke the report is automatically generated and delivered to the state. Reports for all clients are run at once, and a one-page report is produced only if the client has new hire.

GREEN PAYROLL: Can you imagine a completely “green” payroll where there is no paper exchanged? I have that with UBCC. Being a small business with a small staff, I really need to make sure my time is spent being productive. Fewer keystrokes, no hourglass waiting time, and the less paper I have to handle, the better.

ESTUB WITH BENEFITS NOTIFICATION EVERY PAY PERIOD: UBCC's eStub feature allows me to automatically add a active hyperlink to third party services in the email where clients click to access their benefits page or other information. This allows me to communicate with the employee each pay period rather than once per year.

SPECIAL BATCH QUEUES AND CLIENT'S PDF FILE CABINET: Batch queues automate repetitive steps and can be global for all clients or unique to each and every client. As UBCC payroll reports are generated, I have a batch queue set up to automatically print the report as a PDF into the client's PDF folder.

CUSTOMIZATION OF REPORTS MAKES CLIENTS LOYAL FOR LIFE

What separates my services from a big box company is customer service and the ability to instantly generate customized reports. When a client calls for a customized report, typically before we are off of the phone I have already sent them the customized report via email. Delivering a customized report that quickly goes a long way in customer satisfaction. Having the ability to work in this way speaks volumes for the power of UBCC's technology at my fingertips.

PRODUCTIVITY, FLEXIBILITY, AND PORTABILITY ADD UP

Write Up and payroll software that runs on your existing hardware.

Since 1981, UBCC's multi-user, multi-tasking real-time software has helped accounting and payroll practices manage their business with maximum productivity, flexibility, portability.

UBCC software has been engineered to allow for on-demand free flow of information, with the data in the client's system being the client's property – not UBCC's – allowing users to easily get information out at any time and for any reason. All information in UBCC's software data files can be sent to CSV or PDF files, and UBCC users can easily import huge amounts of data from CSV files as well.

The **PRODUCTIVITY** features that UBCC has engineered into their software go well beyond on-demand free-flowing CSV or PDF file information. Users can set up their user station to work in a mouse-driven drop-down or tree-style screen, or set user preferences and choose if he/she wants to work in a heads-down shortcut keystroke command mode to achieve maximum productivity. Whatever mode users find most comfortable or intuitive for their preferences can be accommodated by UBCC. Each user get to define how they want "their" UBCC to work. Users can easily run a one-minute payroll, or print customized, unique, or even odd date reports immediately without any delay for sorting from the technology.

UBCC software has the most **FLEXIBILITY** of any provider on the market. Users import and export data in any order that is needed and do so from the most commonly used accounting and tax preparation software providers including CCH, Lacerte, UltraTax and Drake tax preparation software. It is because of the highly flexible way in which UBCC technology has been engineered that users can easily switch from one tax preparation software to another. This level of flexibility becomes radically important when considering the long-term ramifications of switching technology providers and risking some software that won't allow information out.

UBCC has engineered their software for maximum **PORTABILITY**. Users can easily copy their entire UBCC software application and all client data files to a thumbdrive and instantly use the software on different computer operating systems – which is highly desirable and not common in software. UBCC runs on over 700 platforms, including all Windows, Linux, and UNIX operating systems, and even IBM mainframes. A practice using UBCC can grow from one to hundreds of users or switch operating environments as needed, and preserve its investment in hardware, data files, software and training time. Portability means that a company can count on being able to run its accounting, payroll, and tax software on a five-year old Windows-based PC or the latest operating system.

UBCC OFFERS FOUR DIFFERENT SOFTWARE PACKAGES: Client Data Center, Payroll Service Bureau, PEO Enterprise, and Real-Time Accounting for Business. Modules include: Unified Payroll, General Ledger, Accounts Payable, Accounts Receivable, Bank Reconciliation, Depreciation, Order Billing, Inventory Management, and Job Management. Technical support and customer service is available 24 hours a day, seven days per week.

2009 CPA MAGAZINE TOP 50 PRACTITIONER PRODUCT!

"UBCC has a well-established national client base, who for over a decade have voiced their opinions that UBCC has the most flexible and productive technology on the market."

T. Steel Rose, CPA,
Editor, CPA Magazine

"For 30 years we have provided the accounting, finance, and business industries with technology that allows for the highest level of productivity while remaining uniquely flexible through inherent platform-independent design."

Ken Garen, CPA
