UBCC Announces Bridge to Tax Preparation Packages Including Thomson Reuters UltraTax CS, Drake, Lacerte, CCH, and Intuit ProSeries

March 30, 2010 – Taos, New Mexico - Universal Business Computing Company (www.ubcc.com), the leading provider of high volume, high productivity software for accounting and payroll professionals, today announced new bridging from UBCC General Ledger software to all major tax preparation programs including Thomson Reuters UltraTax, Drake, Lacerte, CCH and Intuit ProSeries.

“Accountants using UBCC General Ledger software enjoy peace of mind in knowing they have the freedom to work with, or shift between, any of the most popular tax preparation packages on a client by client basis, without having to ever change General Ledger software,” said Ken Garen, CPA, Co-founder and President of UBCC. Some tax packages charge accountants for each form by State, which can add layers of expense for those filing returns in many states. “For those who cannot justify a more costly tax software package because they are only creating returns for a few States, bridging from UBCC to a variety of tax products allows the accountant to make choices appropriate for their practice. This allows them to operate in the best of all worlds,” continued Garen. “We are very enthused about the flexibility accountants will enjoy with our bridges between our General Ledger software and the most popular tax preparation programs.”
